

Delivering term maintenance contracts to the Local Authority market

Hammersmith and Fulham Contract

We have a comprehensive highways and civil engineering capability enabling us to deliver any type of term maintenance contract. Our services include the design, build, refurbish and maintenance on every type of road scheme; including motorways, trunk roads, minor roads, footways and town centre improvements.

Contract Details

Our London Borough of Hammersmith and Fulham Term Maintenance Contract has been operational for over 25 years and encompasses all major and minor surfacing works carriageway and road markings. We have held this contract for successive terms totalling over twenty-five years. During this time, we have provided re-surfacing to carriageways and footways in the area as well as road-markings.

The current contract covers minor and major carriageway maintenance and road marking works within the London Borough of Hammersmith and Fulham (LBHF) and utilises a number of varied materials including flexible and rigid, kerbing, reinstatements, pothole repairs, ironwork adjustments, planning and surfacing.

We have worked in partnerships with the LBHF to carry out works beyond the scope of the contract and this has led to us working on some prestigious London bridges, including Hammersmith Bridge and Olympia Bridge. We have also introduced recycled binder and base courses onto the network, along with our in house 'Repave' surface course recycling process and specialist surface treatments such as slurry sealing and anti-skid surfacing.

The contract was re-tendered and re-secured in April 2010 and will run for a further five years until 2015, with one year options to extend it for a further period of three years to 2018.
