

## Delivering term maintenance contracts to the Local Authority market

# Leeds City Council Contract

**We have a comprehensive highways and civil engineering capability enabling us to deliver any type of term maintenance contract. Our services include the design, build, refurbish and maintenance on every type of road scheme; including motorways, trunk roads, minor roads, footways and town centre improvements.**

### Contract Details

Colas currently operate on two term maintenance contracts on behalf of Leeds City Council.

#### Minor Works Contract

Our minor works contract is mainly related to the maintenance of existing schemes. The contract, which was renewed in January 2010, is a two year contract and has been operated by Colas since 2005. During this period we have maintained excellent client relationships.

We are now in our 7th year, having secured several re-bids to this contract over the years.

The current contract agreement demonstrates the strength of our relationship with this client.

We advise them on sustainable treatments and look at alternative methods of road construction, e.g. Retread for footways instead of full re-construction, which reduces the level of disruption to local residents and benefits the environment. Under the contract we provide road maintenance solutions including carriageway and footway reconstruction, full carriageway resurfacing, re-kerbing, ducting and drainage works.

#### Highway Works Term Contract

We were awarded this contract originally in 2005 and have secured three successive renewals since this time. This reflects the level and quality of service we have offered throughout. The scope of this contract includes kerbing and drainage works, pedestrian crossing installation, highway and junction improvement schemes, new bus or priority lanes, traffic calming schemes and accident reduction schemes.

The contract focuses largely on new schemes of work. We are currently performing well with our highway services for this client and our management team has excellent relationships with client officers. We are now offering early contract involvement to assist with the preparation of forthcoming schemes.
