

Delivering term maintenance contracts to the Local Authority market

Wirral Term Maintenance Contract

We have a comprehensive highways and civil engineering capability enabling us to deliver any type of term maintenance contract. Our services include the design, build, refurbish and maintenance on every type of road scheme; including motorways, trunk roads, minor roads, footways and town centre improvements.

Contract Details

Colas were awarded the Wirral Term Maintenance Contract in October 2008. This five year highways and engineering services contract came into effect on 1 April 2009. We are responsible for the delivery and operation of a wide range of highways services including footway and carriageway repairs, traffic signs, street furniture, emergency response and winter maintenance.

This contract signals our ambitious plans for further expansion into term maintenance contracts and builds on our previous experience and successes in partnering projects with Portsmouth and East Sussex Councils.

It also consolidates our high profile and presence in the North West. We also provide maintenance and management services as a significant partner in a successful joint venture in MAC Area 10 on behalf of the Highways Agency, and on a further contract where we supply specialist treatments for Stockport and Trafford Councils.
